- In her latest book, Bren é Brown writes, “ If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection. ” In Atlas of the Heart, Brown takes us on a journey

through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances—a universe where we can share and steward

the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. Over the past two decades, Brown ' s extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives.

Atlas of the Heart draws on this research, as well as on Brown ' s singular skills as a storyteller, to show us how accurately naming an experience doesn ' t give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, “ I want this book to be an atlas for all of us, because I

For many years, this text has provided the primary, and often the sole, reference for detailed information and practical experience in blood transfusion. The book is completely revised and updated throughout to include

the latest advances and developments in the field.

This text is aimed at defining the current concepts that define trauma induced coagulopathy by critically analyzing the

most up-to-date studies from a clinical and basic science perspective. It will serve as a reference source for any clinician interested in reviewing the pathophysiology, diagnosis, and management of the coagulopathic trauma patient, and the data that supports it. By meticulously describing the methodology
