Big Data can easily get out of control and become a monster that consumes you, instead of the other way around. Here are some Big Data best practices to avoid that mess. Big Data has the potential to offer remarkable insight, or completely overwhelm you. The choice is yours, based on the decisions you make before one bit of data is ever collected. The chief problem is that Big Data is

Successful companies that use data selectively, analyze them wisely and apply them to improve their decision making, will gain a competitive advantage over those that don't. Big data affects almost every industry and every job. Almost everything you do at work and much of what you do at home - web surfing, social media activity, watching TV, playing online games, and sending emails and texts - now produces data that multiple organizations collect, analyze and act on for their profit.
