high-speed DEUTZ diesel engines. It includes specifications regarding DEUTZ lubricating oil Quality Classes (DQC) as well as the requirements and release procedures. DEUTZ is the sole owner of the trademark DQC which is protected with the German Department for Patents and Brand Names under file number 304 59 318.

Advanced Ceramic Technologies & Products describes the development, materials, and manufacturing processes for various ceramic products. The text focuses on the products themselves, and tries to clarify how ceramics have contributed to our lives.

Written as a sequel to The Agricultural Tractor 1855-1950 by R. B. Gray and Farm Tractors 1950-1975 by Lester Larson, each chapter lists most of the new tractors introduced for that year, a summary of the specifications for the models, and information about the companies manufacturing the tractors.

Until now, information regarding chemical spill clean-up was available only through manufacturer's literature from an individual firm, or scattered in the traditional textbooks on remediation engineering and hazardous waste management. Survey of Chemical Spill Countermeasures provides a one-stop source of information on how to clean up spill sites in safe, acceptable ways. Because of the ever-growing need to maintain constant vigilance over hazardous chemicals and potential leaks and spills, this reference will become an important source for the practicing environmental engineer and field technician. Survey of Chemical Spill Countermeasures provides operators with useful information on how to clean up sites, including controlling leakage, containment of spills on land and water, and ways to safely transfer and store the contaminants. Additionally, the book includes up-to-date information on containment and treatment technologies, from dredging and vacuuming, to solid and vapor treatment systems.
