Internal e-business integration refers to sharing information electronically and automatically between different business functions within an enterprise as opposed to external integration, in which other business partners are involved. Internal integration potentially streamlines and boosts the efficiency of an enterprise.

organisation's objectives  
and equitably satisfy the  
stakeholders.

## ~~Management Integration: Benefits, Challenges and Solutions~~

Business integration is a reflection of how IT is being absorbed as a function of business. Business integration has many implications for the role of the corporate CIO, one of which is that the CIO will be taking on additional responsibilities such as business process management. In the past, the CIO was mainly responsible for IT processes.
