Written in the context of the post-9/11 legal climate, this text introduces all the major areas of aviation, covering such topics as the international air law regime, crimes involving aircraft, international air carriage, litigation management, and governmental immunity from liability.

For courses in Electronic Commerce. Global e-Commerce: Text and Cases builds theory, fundamentals and structure to show how business models are being transformed by the evolving business order. It combines the traditional business and economics concepts and the emerging principles and theories to draw a blueprint for the network economy. It also uses a set of rich global case studies to show how companies can use the marketplace to expand their market reach, minimize costs, shorten production and ordering cycle time, and ultimately enhance customer value and loyalty. \*A rich mix of 16 full-fledged case studies of companies operating in different parts of the world - Highlight specific contexts within which the new business order is taking shape. \*Reinforces the application of concepts covered in the book and places e-commerce in an international context. \*An up-to-date set of company vignettes - Highlight a particular problem or challenge. \*Allows students to apply concepts in a business environment. \*Ten chapters covered in four modules - Module 1: Building a New Business Ecosystem outlines the way in which the three major parts of the emerging e-commerce environment - the markets

This handbook is intended to be a comprehensive reference for the various chemical aspects of foods and food products. Apart from the traditional knowledge, this book covers the most recent research and development of food chemistry in the areas of functional foods and nutraceuticals, organic and genetically modified foods, nonthermal food processing as well as nanotechnology. This handbook contains both the basic and advanced chemistry both for food research and its practical applications in various food related industries and businesses. This book is appropriate for undergraduates and postgraduates in the academics and professionals from the various disciplines and industries who are interested in applying knowledge of food chemistry in their respective fields.

Demetrius of Phalerum (c. 355-280BCE) of Phalerum was a philosopher-statesman. He studied in the Peripatos under Theophrastus and subsequently used his political influence to help his teacher acquire property for the Peripatetic school. As overseer of Athens, his governance was characterized by a decade of domestic peace. Exiled to Alexandria in Egypt, he became the adviser of Ptolemy. He is said to have been in charge of legislation, and it is likely that he influenced the founding of the Museum and the Library. This edition of the fragments of Demetrius of Phalerum reflects the growing interest in the Hellenistic period and the philosophical schools of that age. As a philosopher-statesman, Demetrius appears to have combined theory and practice. For example, in the work On Behalf of the Politeia, he

almost certainly explained his own legislation and governance by appealing to the Aristotelian notion of politeia, that is, a constitution in which democratic and oligarchic elements are combined. In *On Peace*, he may have defended his subservience to Macedon by appealing to Aristotle, who repeatedly recognized the importance of peace over war; and in *On Fortune*, he will have followed Theophrastus, emphasizing the way fortune can determine the success or failure of sound policy. Whatever the case concerning any one title, we can well understand why Cicero regarded Demetrius as a unique individual: the educated statesman who was able to bring learning out of the shadows of erudition into the light of political conflict, and that despite an oratorical style more suited to the shadows of the Peripatos than to political combat. The new edition of secondary reports by Stork, van Ophuijsen, and Dorandi brings together the evidence for these and other judgments. The facing translation which accompanies the Greek and Latin texts opens up the material to readers who lack the ancient languages, and the accompanying essays introduce us to important issues. The volume will be of interest to those interested in Greek literature, Hellenistic philosophy, Hellenistic history, and generally to persons captivated by the notion of philosopher-statesman.

The rehabilitation of Parkinson's disease patients comprises various forms of therapy: physical, speech and psychosocial therapy. Physical rehabilitation is used in conjunction with various anti-parkinsonian agents as a non-pharmacological treatment for Parkinson's disease. This book explores the long-term and short-term benefits of physical therap
