In Lesson Five you will sit your midterm, covering the first half of the course, and Lesson Nine will be your final. If you are a non-native English speaker or have a learning disability, please mark "NES" or "LD," respectively, at the top of your essays and this will be taken into account when grading.

Transfiguration (TNFG-101) | Lesson 1

There are three basic rigid transformations: reflections, rotations, and translations. Reflections, like the name suggests, reflect the shape across a line which is given.

Basic Rigid Transformations: Reflections, Rotations ...

A comprehensive package of lessons on the four types of transformations. Starter recaps previous learning. Several task and extensions activities provided with fully worked solutions. Mini-plenary and plenary tasks embedded in all. Worksheets are provided at the end of the Powerpoint. I hope it's been worth it for yourselves and your students!

Lesson 8-1: Transformations

Transformations are described as the movement of a line, point, or object within a coordinate plane. The four main types of Transformations are translations, reflections, rotations, and dilations. Generally,

Transformations are best solved using a grid or coordinate plane because they provide accurate referencing when moving an object, line, or point.
