The position vs. time graph should be represented with a positively sloped line whose slope steadily decreases to zero. The y-intercept of the graph may be any value. The line on the velocity vs. time graph should have a positive y-intercept and a negative slope. Because the final velocity of the book is zero, the line should finish on the x-axis. The position vs. time graph should be ...

Chapter 2

This new edition of Mastering Physics has been completely updated and rewritten to give all the information needed to learn and master the essentials of physics. It is a self-contained, clearly explained course for individual study or classroom use which requires no prior knowledge. The book is highly illustrated throughout to show the importance of physics in the natural world, as well as in such fields as athletics, engineering, medicine and music. Questions and examples are also included throughout covering a broad range of topics such as environmental issues, motor racing and space flight.

Presents high school-level physics instruction, covering one- and dimensional-motion, forces and mechanics, energy and momentum, gravity and satellite motion, thermodynamics, waves and sound, electric interactions, and light and optics. Each chapter begins with

clearly stated objectives and includes reviews of content, examples, key chain sidebars, and practice questions and solutions.

Building on the research-proven instructional techniques introduced in Knight's *Physics for Scientists and Engineers*, the most widely adopted new physics text in more than 30 years, *College Physics: A Strategic Approach* set a new standard for algebra-based introductory physics--gaining widespread critical acclaim from professors and students alike. For the Second Edition, Randy Knight, Brian Jones, and Stuart Field continue to apply the best results from educational research and refine and tailor them for this course and the particular needs of its students. New pedagogical
