Ideal for use with any introductory physics text, Loyd's PHYSICS LABORATORY MANUAL is suitable for either calculus- or algebra/trigonometry-based physics courses. Designed to help students develop their intuitive abilities in physics, the third edition has been updated to take advantage of modern equipment realities and to incorporate the latest in physics education research. In each lab, author David Loyd emphasizes conceptual understanding and includes a thorough discussion of physical theory to help students see the connection between the lab and the lecture. Each lab includes a set of pre-lab exercises, and many labs give students hands-on experience with statistical analysis. Equipment requirements are kept at a minimum to allow for maximum flexibility and to make the most of pre-existing lab equipment. For instructors interested in using some of Loyd's experiments, a customized lab manual is another option available through the Cengage Learning Custom Solutions program. Now, you can select specific experiments from Loyd's PHYSICS LABORATORY MANUAL, include your own original lab experiments, and create one affordable bound book. Contact your Cengage Learning representative for more information on our Custom Solutions program. POLICE CRIME CONTROL STRATEGIES is a practical, realistic, one-of-a-kind book that provides readers with a balanced assessment of approaches to police crime reduction. Written by an expert in the field of law enforcement, this book covers the strengths and weaknesses of a variety of approaches including crime-specific, community-oriented, problem-oriented, hot spot targeting, concentrated patrol deployment, broken windows enforcement, and intelligence-guided. Opening chapters trace the accumulating evidence for the substantial impact upon crime that focused police efforts can have. Community and problem-oriented programs are reviewed in the context of their employment for crime reduction. State-of-the-art strategies are organized by three targeting foci: geographic, offense, and offender. The role of investigative units in proactive crime reduction is critically assessed and Compstat as a framework receives special attention. Also discussed are crime strategy meetings, and staffing and deployment for crime control. Care is taken to review both the successes and failures of structured efforts both in suburban environments and major cities so that readers are provided with an unbiased overview of policing in the real world. For courses in Introductory Algebra-based Physics. This text features a combination of unique pedagogical tools - exercises, worked examples, active examples, conceptual checkpoints - that provide the right tool at the right time and place. This text employs each tool when and where it can contribute most to developing students conceptual insight hand-in-hand with developing their problem-solving skills. - Modified/Improved examples - The Picture the Problem step has been enhanced to better explain how students should approach sketching the problem. The Strategy step has been enhanced to better map out the thought process used in the Solution. - Additional Integrated Problems - Now make up approximately 20 percent of the end-of-chapter Problems. - Additional, new, and revised end-of-chapter Problems - Approximately 10 percent more, 25 percent new or revised. - Four pedagogical tools - Worked Examples, Active Examples, Conceptual Checkpoints, Exercises - are integrated into each chapter. - Picture the Problem - Always accompanied by a figure, this step discusses how the physical situation can be represented visually and what such a representation can tell us about how to analyze and

Exploring Biology in the Laboratory: Core Concepts is a comprehensive manual appropriate for introductory biology lab courses. This edition is designed for courses populated by nonmajors or for majors courses where abbreviated coverage is desired. Based on the two-semester version of Exploring Biology in the Laboratory, 3e, this Core Concepts edition features a streamlined set of clearly written activities with abbreviated coverage of the biodiversity of life. These exercises emphasize the unity of all living things and the evolutionary forces that have resulted in, and continue to act on, the diversity that we see around us today.
