## Sequence Of Events Earth Science Lab Answer

Other Guidelines for figuring out a sequence: Sedimentary rocks are usually formed under water. Weathering and erosion usually happen above water (on dry land). Contact metamorphism shows that the rock that was changed was there first when the intrusion happened. All three layers of rock (limestone, sandstone, shale) were made, then the volcano formed.

Bringing Earth Science to Life - EdGEO

Skill Set Objectives of the Earth Science Major. While completing the Earth Science major, students acquire a broad range of skills in mathematics, chemistry, physics or biology. Students can determine the environmental and/or geologic events that have led to the structures and features of a location and analyze a field site or geologic region. Graduates can use the basic equipment of a geologic and/or environmental science laboratory.
