The internment of thousands of Japanese Americans during World War II is one of the most shameful episodes in American history. This history and reference guide will help students and other interested readers to understand the history of this action and its reinterpretation in recent years, but it will also help readers to understand the Japanese American wartime experience through the words of those who were interned. Why did the U.S. government take this extraordinary action? How was the evacuation and resettlement handled? How did Japanese Americans feel on being asked to leave their homes and live in what amounted to concentration camps? How did they respond, and did they resist? What developments have taken place in the last twenty years that have reevaluated this wartime action? A variety of materials is provided to assist readers in understanding the internment experience. Six interpretive essays examine key aspects of the event and provide new interpretations based on the most recent scholarship. Essays include: - A short narrative history of the Japanese in America before World War II - The evacuation - Life within barbed wire-the assembly and relocation centers - The question of loyalty-Japanese Americans in the military and draft resisters - Legal challenges to the evacuation and internment - After the war-resettlement and redress A chronology of events, 26 biographical profiles of important figures, the text of 10 key primary documents--from Executive Order 9066, which authorized the internment camps, to first-person accounts of the internment experience--a glossary of terms, and an annotative bibliography of recommended print sources and web sites provide ready reference value. Every library should update its resources on World War II with this history and reference guide.

Most of us think that valedictorians can write their own ticket. By reaching the top of their class they have proven their merit, so their next logical step should be to attend the nation's very best

universities. Yet in *Top Student, Top School?*, Alexandria Walton Radford, of RTI International, reveals that many valedictorians do not enroll in prestigious institutions. Employing an original five-state study that surveyed nine hundred public high school valedictorians, she sets out to determine when and why valedictorians end up at less selective schools, showing that social class makes all the difference. Radford traces valedictorians' paths to college and presents damning evidence that high schools do not provide sufficient guidance on crucial factors affecting college selection, such as reputation, financial aid, and even the application process itself. Left in a bewildering environment of seemingly similar options, many students depend on their parents for assistance—and this allows social class to rear its head and have a profound impact on where students attend. Simply put, parents from less affluent backgrounds are far less informed about differences in colleges' quality, the college application process, and financial aid options, which significantly limits their child's chances of attending a competitive school, even when their child has already managed to become valedictorian. *Top Student, Top School?* pinpoints an overlooked yet critical juncture in the education process, one that stands as a barrier to class mobility. By focusing solely on valedictorians, it shows that students' paths diverge by social class even when they are similarly well-prepared academically, and this divergence is traceable to specific failures by society, failures that we can and should address.
